MST
max speed technology

SPECIFICATION

- 1:10 DRIFT CAR
- WHEELBASE : 257mm
- WIDTH : 190mm
- DRIVE MODE : RWD
- CASTER:
  adjustable 12 / 14 / 16 / 18 degree
- FULL BALL BEARING
- HYDRAULIC DAMPER SET

532183

FXX 2.0S

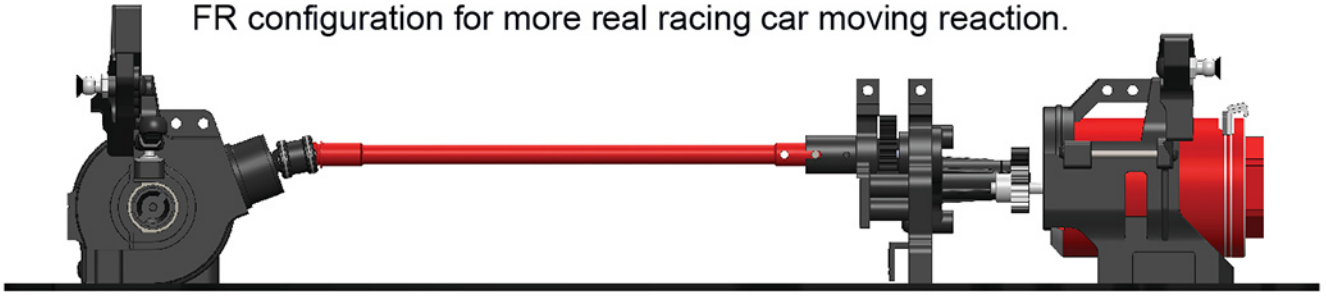

1/10 SCALE RC RWD HIGH PERFORMANCE DRIFT CAR

New integrated design of the MST development team inherits the centralized chassis configuration of the FXX 2.0 KMW center of gravity and the new great amount front suspension system closer to the real drift car. Using the system which is specific for rear-wheel drive drift car designed suspension is able to create a greater steering angle. Also introducedthe MB rear suspension system for more rear steering wheel changes.The retuned secondary reduction ratio optimizes the control of the throttle. The new generation FXX 2.0S is amazingly progressive.

The MST development team hopes to present more controlling fun to the players!

More infromation

FR configuration for more real racing car moving reaction.

FXX 2.0

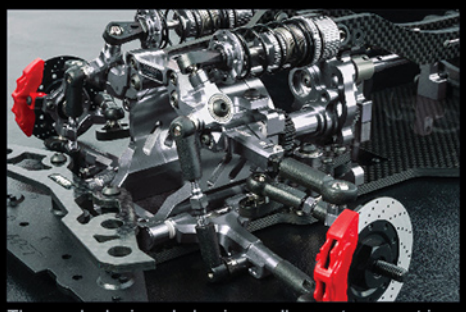

1/10 SCALE RC RWD HIGH PERFORMANCE DRIFT CAR

KMW

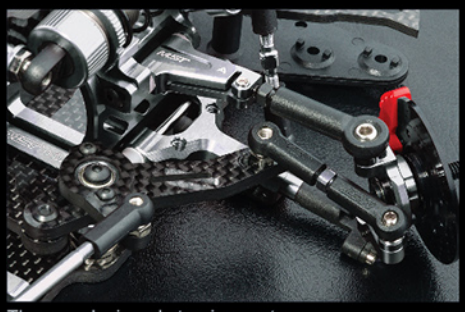

The global limited edition FXX 2.0 KMW will be released!! KMW has the updated technology, highest performance, and high quality chassis. It has the new integrated design and the full upgrade kits to display in an ultra-high performance! The car body comes withan aluminum alloy nameplate of a limited serial number to highlight the uniqueness.

More infromation

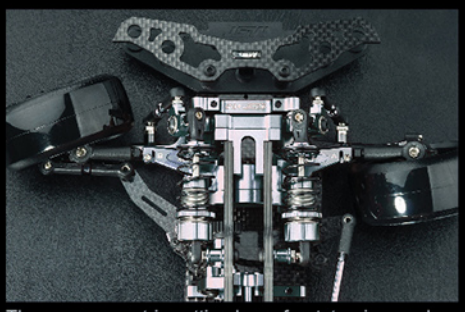

FEATURES

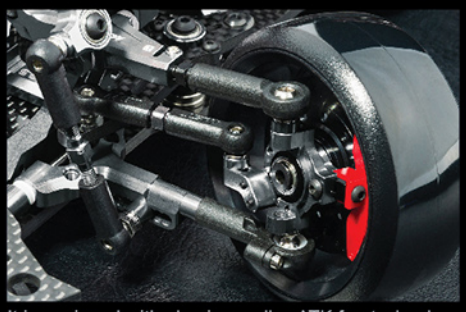

The newly designed aluminum alloy motor mount is capable with the new aluminum alloy upper swing arm and the new hem arm

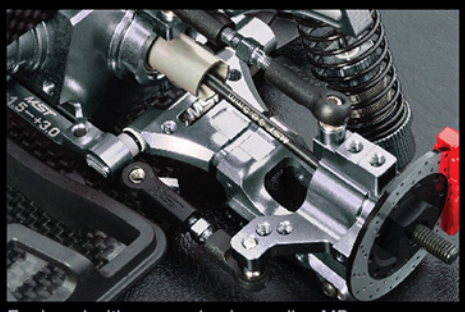

The new designed steering system

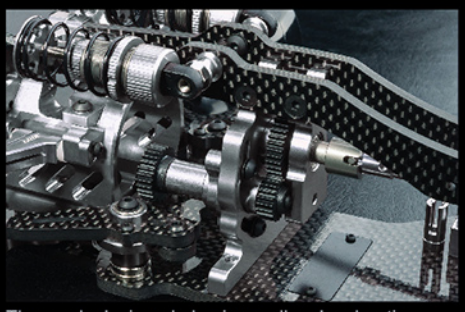

The new geometric setting large frontsteering angle allow the body to make a greater drift angle

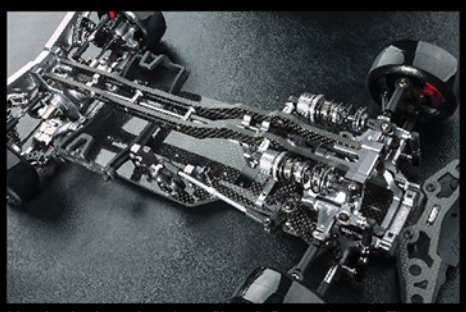

It is equipped with aluminum alloy ATK front wheel seat. The exclusive adjustable designof three-stage tow distance and four-direction Ackermann lock points, allowing the front wheel to turn at a large angle and having more Ackermann angle settings

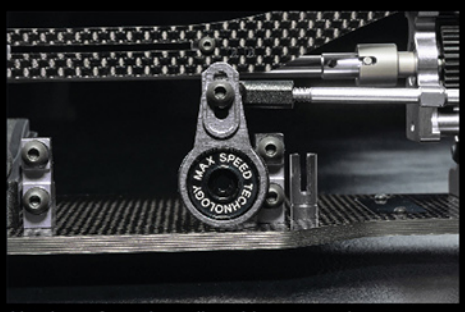

Equipped with a new aluminum alloy MB rear suspension system. The rich adjustment mechanism can use the change of gravity on the corner by the body side tilt for the rear wheel steeringand to increase or decrease the tail slip force

The newly designed aluminum alloy deceleration system has more gear ratio adjustments

Newly designed carbon fiber 3.5mm chassis.The electric equipment is more concentrated towards the rear, so that the front and rear have a good weight distribution.

Aluminum 8-section adjustable servo swing arm

Aluminum realistic brake disc caliper set

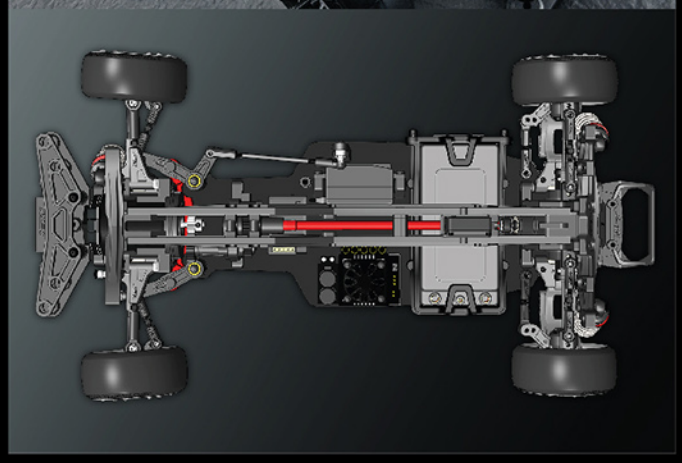

FXX 2.0S

1/10 SCALE RC RWD HIGH PERFORMANCE DRIFT CAR

[facebook.com/MST.tw]
[rc-mst.com]

FEATURES

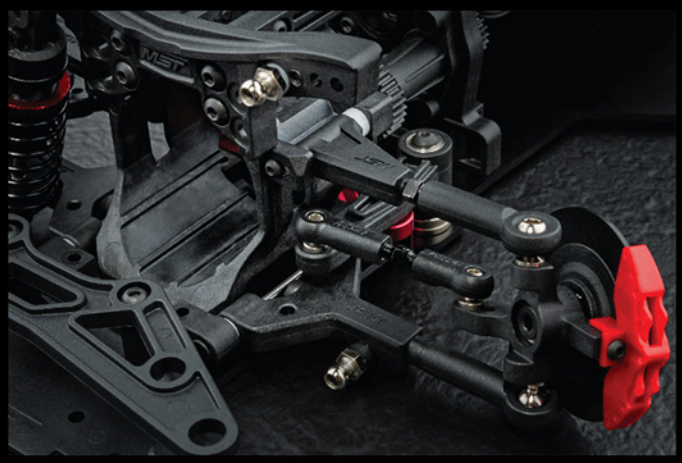

A whole brand new design of CNC cutting chassis with readjusted portion of the gravity center for makes the chassis better weight distribution

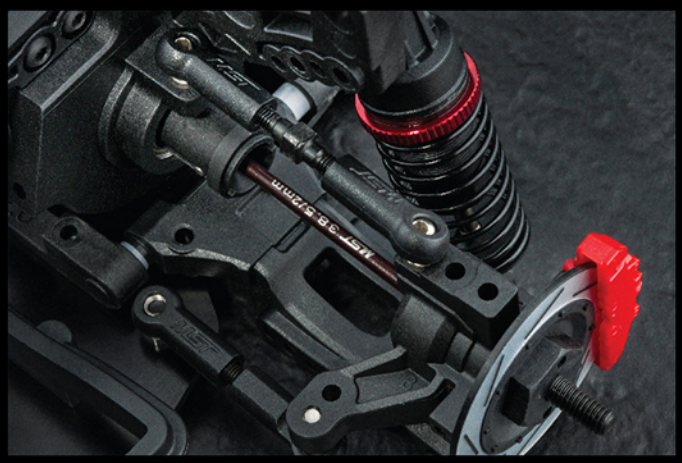

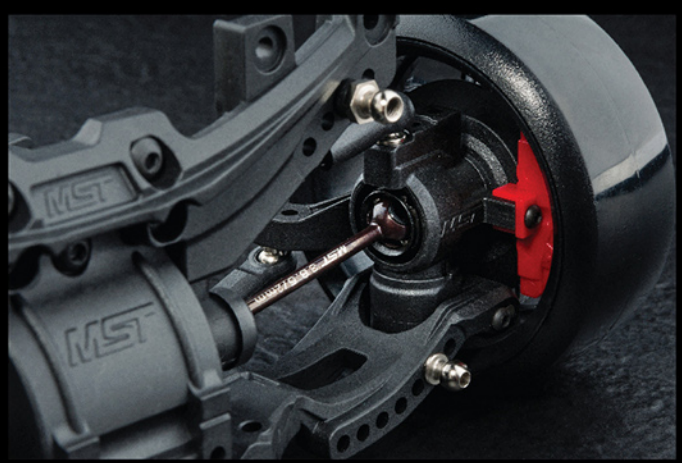

The new integrated steering system with new aluminum alloy steering connection plate, the new geometric setting has a large front wheel steering angle, enable the vehicle a greater drift angle

A newly motor basis design with new suspension system and ATK great steering angles upright

Equipped of new generation MB rear suspension system with the diverse adjustment mechanism can through change of gravity on the corner to makeby the body side tilt for the rear wheel steering, and to increase or decrease the tail slip force

Steel CVD axle of rear transmission system

Standard realistic caliper and disc shape brake set
